

CERTUS PAPYRUS

PRODUCT SHEET

Create Pre-defined Printer Workflows

Streamline process by predefining print workflow and choosing which Maximo reports will be printed, to which devices.

User-defined parameters enable you to select where each report will be printed. For example, warehouse labels can be directed a dedicated label printer or multi-part forms to a dedicated device or specific paper source.

In addition, reports containing sensitive information can be setup to automatically routed to a device in a secure or non-public location, thus preventing security or data violations caused by simple human error.

CERTUS PRINT ENGINE
ENABLING YOU TO
DEFINE WHICH REPORTS
PRINT TO WHICH
PRINTER

STREAMLINES PROCESSES BY
DEFINING PRINT DEVICES AS
PART OF YOUR WORKFLOW

ADD SECURITY BY
DEFINING SECURE
PRINTERS FOR
